

"We find Four Soft's products simple to understand, adaptive and the most suitable for our freight/logistics operations."

Neil McGlynn, WT Group

4S eTrans

4S eTrans is a web-centric software solution for logistics service providers designed to give operational and financial control of global and domestic freight movements from receipt of the order to recognition of income.

Covering all modes of transport, it gives control and visibility of real-time data to all parties involved in the supply chain, enabling improved operational profitability and enhanced customer service.
